Tashkent, Yunusabad - 6, 23/30

SUMMARY

Motivated Computer Science student with a solid foundation in frontend development. Skilled in JavaScript, React, Vue.js, and TypeScript, with experience building responsive, type-safe, and user-friendly web applications. Strong problem-solving and collaboration skills, eager to apply technical knowledge to real-world projects and grow expertise in modern software development.

WORK EXPERIENCE

Front-end Developer, AutoClick   **Jul 2025 - Present**

- Built a role-based car transfer management system using React, TypeScript, and React Query, with strong focus on type safety and maintainability.
- Designed responsive user interfaces with robust error handling and a two-step workflow to streamline complex operations.
- Collaborated across the full development cycle, integrating APIs and implementing best practices for scalable and reliable frontend architecture.

Front-end Developer Intern, Trigger Outsource   **May 2025- Aug 2025**

- Developed and launched a responsive website for an education center, improving online visibility and accessibility for students.
- Delivered custom web solutions for client projects, applying modern frontend frameworks and clean UI/UX practices.
- Applied version control (Git/GitHub) and agile workflows to manage multiple orders and maintain high-quality standards.

EDUCATION

Bachelor of Computer Science and Information Engeneering   **Sep 2024 - May 2028**

INHA University in Tashkent
- Bachelor's degree in Computer Science, focusing on software development.
- Gaining hands-on experience through projects and coding activities.
